

Virtual Meeting Committee

After the last Board of Trustee's meeting, a discussion was started in the Trustees Whats App group. The overall mood of the conversation was that instead of trying to create a platform that we should use something already available and make it fit our needs.

The committee utilized a member who had experience with holding seminars on zoom who had similar requirements for their meetings. The committee came up with some rules and procedures that would make those work.

The committee had two test meetings that even though trustee attendance was low both meetings ended up with positive results pointing to the platforms use in being able to host a virtual trustee meeting.
