

Domestic Borders Committee Report March 2019

The committee is no longer working with conference calls each month. Information is being sent to the committee chair with the finished work of states involved with multiple area designations.

One of the members has been responsible for finalizing areas in a color and key coded format. This type of format will make the file we hope to finalize in the future, very easy for those who are going to utilize the maps in their completed form.

We hope to have some samples completed for the BOT committee report for Louisville.

David M. – Committee Chair
Area 12
