

## **Domestic Borders Committee Report August 2019**

The committee has come to a point where some of the states that have multiple BOT area coverage, show counties that are unassigned by the terms of the Confidential Trustee Listing. Along with that, comes the task of the committee members assigned to getting the area information on boundaries, not being able to get enough commitments for some are Intergrups to expand their boundaries. This has brought the committee to the point of having an item on the Montreal agenda, as to what the feelings are of the BOT for the best recommendations to move forward.

Although the BOT will not be asked for a formal decision regarding this issue, the committee will take any suggestions and try to 'encourage' those affected areas with some solutions to have all counties officially covered by an area designation.

We therefore look to target the Seattle Trustee meeting for our final results, which we hope will be mutually agreeable to all areas.

David M. – Committee Chair  
Area 12, New Jersey
