

We had a short month in February but the work of the IRC seems to always be there. We were submitted by a letter from the Brazilian RSO about some questions about our guidance code. I was unable to completely understand the google translation from Portuguese and asked the committee members from South America to help out. They reached out and are handling the situation.

Another issue came out of South Africa about how meetings are held and format styles. I explained each meeting is self governing and I suggested they refer to the trustees in that area to get help with the situation.

Same thing happened in New Zealand and a GA member wanted to start a meeting in their town and with the help of Zeny, we were able to get them in contact with folks there to help them. The new group form was sent to them.

Help was asked from the African country of Kenya and we are addressing that question and finally I was in contact with the group that was meeting in Armenia for a few months. They had received a combo book from Moscow in Russian and were able to translate it to Armenian, I sent them a new group form so we could recognize this group. I will also try to get a copy of the translation to have the trustees approve it as GA literature.

Lets see what March has in store for us.
