

For the IRC report , the month of January has consisted mostly of putting fires out in different parts of the world. We have strong personalities and we have come across multiple countries who have had issues between members or groups. Even an issue from one intergroup to another for a particular country. The countries I am talking about are Australia, Greece and the Netherlands.

I have also been contacted by Latvia who want to translate multiple GA approved literature. They want me to put it on the trustee agenda and make sure it is done correctly as per our guidance code. Also they wanted me to update their meeting list.

Thank you for letting me be a service.
