

## Trustee Website Committee February 2017

---

As of this report, submitted on 2/28, the agenda stands at 70 items with a significant number of other items that have been submitted, but are awaiting approval of the BOT Chair. With about 32 hour left before the agenda for Cherry Hill is closed, we are expecting a lot of last minute items to be submitted.

Immediately after the closing time of midnight ET (GMT -5) on the evening of Wednesday, 3/1 the rolling agenda will be restricted from view, so that members do not download the rolling agenda. The official agenda will be released 2 weeks later and all Trustees are reminded to check with the Trustee website home page for the various deadlines until the Trustee meeting begins on Sunday, 4/30.

After a rather bumpy start, with many items not being sent in following the requirements necessary to have the items approved, the last few weeks have been somewhat easier for the BOT Chair to work with. Attachments will be visible with the final agenda.

No new features have been added to the site since last month's report. The removal and transfer of the Life-Line Bulletin has been accomplished and that feature now resides on the ISO website, under its own line off the home page. The Trustee website will retain the link for the Bulletin, with the notice that the publication is no longer available on the Trustee website. The website page on the Trustee website will be completely removed in a few months.

There are a few items on the agenda that directly affect the Trustee website. The discussions will not doubt be 'robust'.

David M. – Committee Chair
